

**ADULT TUBERCULOSIS (TB) RISK ASSESSMENT QUESTIONNAIRE
CERTIFICATE OF COMPLETION**

(To be signed by health care provider completing the risk assessment and/or examination)

Name: _____

Date of Birth: _____

Date of Risk Assessment: _____

The above named patient has submitted to a tuberculosis risk assessment, and if tuberculosis risk factors were identified has been examined and determined to be free of infectious tuberculosis.

Health Care Provider Signature	Date		
Health Care Provider Name	Title		
Office Address: Street	City	State	Zip Code

Telephone _____ Fax _____

Adult Tuberculosis (TB) Risk Assessment Questionnaire¹
 (To satisfy California Education Code Section 49406 and Health and Safety Code Sections 121525-121555)
To be administered by a licensed health care provider (physician, physician assistant, nurse, nurse practitioner)

Name: _____

Date of Birth: _____

Date of Risk Assessment: _____

History of positive TB test or TB disease Yes No

If yes, a symptom review and chest x-ray (if none performed in previous 6 months) should be performed at initial hire.

If there is a "Yes" response to any of the questions #1-5 below, then a tuberculin skin test (TST) or Interferon Gamma Release Assay (IGRA) should be performed. A positive test should be followed by a chest x-ray, and if normal, treatment for TB infection considered.

1. One or more signs and symptoms of TB (prolonged cough, coughing up blood, fever, night sweats, weight loss, excessive fatigue) <i>Note: A chest x-ray and/or sputum examination may be necessary to rule out infectious TB.²</i>	Yes <input type="checkbox"/> No <input type="checkbox"/>
2. Close contact with someone with infectious TB disease	Yes <input type="checkbox"/> No <input type="checkbox"/>
3. Foreign-born person (Any country other than the United States, Canada, Australia, New Zealand, or a country in Western or Northern Europe.)	Yes <input type="checkbox"/> No <input type="checkbox"/>
4. Traveler to high TB-prevalence country for more than 1 month (Any country other than the United States, Canada, Australia, New Zealand, or a country in Western or Northern Europe.)	Yes <input type="checkbox"/> No <input type="checkbox"/>
5. Current or former resident or employee of correctional facility, long-term care facility, hospital, or homeless shelter	Yes <input type="checkbox"/> No <input type="checkbox"/>

Once a person has a documented positive test for TB infection that has been followed by an x-ray that was deemed free of infectious TB, the TB risk assessment is no longer required.

Wiseburn Unified School District

The California Healthy Schools Act requires the Department of Pesticide Regulation to promote and facilitate the voluntary adoption of IPM programs by schools. The agency is required to: establish a model IPM program consistent with the law's IPM definition; develop an IPM program guidebook; maintain an internet web site with IPM and pesticide information; and establish an IPM training program. The law also requires the Department to collect from pesticide applicators records of pesticide use in schools. California education and environmental protection laws require that IPM be included in the state's environmental education curricula and principles.

As part of the IPM training, all volunteers or contractors working at a school site need to complete the IPM training. To start the process, please register as a volunteer or contractor with the links below:

Contractors: <http://ipm.wiseburn.org/Register/Contractor>

Volunteers: <http://ipm.wiseburn.org/Register/Volunteer>

Access Code: CAB5309_001

After you've signed up through the website, you will get instructions on how to complete the training and upload your Certificate of Completion onto the IPM Codex system. **You will also need to provide a copy of the certificate of completion to the school site.**

IPM DEFINITIONS

Following are IPM definitions included in the laws and regulations summarized above only. IPM definitions that may appear in other state laws and regulations are not listed here.

California. Ca. Food & Agric. Code § 13181: "Notwithstanding any other provision of law, for purposes of this article, 'integrated pest management' means a pest management strategy that focuses on long-term prevention or suppression of pest problems through a combination of techniques such as monitoring for pest presence and establishing treatment threshold levels, using nonchemical practices to make the habitat less conducive to pest development, improving sanitation, and employing mechanical and physical controls. Pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property, and the environment, are used only after careful monitoring indicates they are needed according to pre-established guidelines and treatment thresholds. This definition shall apply only to integrated pest management at school facilities and child day care facilities."
